

Vespa Stolen Scooter Reunited with Owner Within Hours

Official Police Security Initiator

Stolen Vespa is recovered

Our customer reported his Vespa stolen when he left work. Automatrics remotely alarmed the Automatrics MTrack unit and dispatched a radio signal finder to find the scooter despite GPS signals being blocked.

The Metropolitan Police soon arrived to help secure the scooter until the owner collected at 3 am. One of the attending Police officers was totally

Automatrics Service Level agreement with AVCIS ACPO Vehicle Crime Intelligence Service was finalised on the following day after this scooter recovery.

The AVCIS partner agreement with Automatrics focus is on the safe recovery of stolen vehicles, including communication assistance with national and international law enforcement.

AVCIS have additionally been equipped with Automatrics radio tracking technology to aid recovery operations subject to AVCIS resource availability.

Radio signal finders, will where required, use hand-held radio direction receivers to pickup and home-in on the Automatrics MTrack's audibly silent secret RF radio frequency. As no GPS signal was received, as out of satellite view, the scooter was located with radio finding technology under a block of flats.

The Automatrics MTrack Stolen Vehicle tracking system is the preferred choice for many bike owners as it is especially suited to the higher protection needs of motorcycles and scooters.

This unique tracking system has self powered or vehicle powered options.

The advanced three layer location technology enables any vehicle to be tracked and recovered even in the most challenging environments. Such as underground car parks, in the back of a van or inside a shipping container.

This quick find, returning a Vespa 300 back to it's rightful owner with the support of the Metropolitan police demonstrates why Automatrics' could reasonably claim to provide:

The Ultimate Theft Recovery Service

impressed with the accuracy and ability of the Automatrics MTrack radio signal location system

The Metropolitan Police officer rated system accuracy as far superior to the old Tracker Network VHF radio system.

He further commented that the average daily tally of 15-20 stolen motorcycles in their London patch alone could definitely benefit from such an accurate and dedicated service. The owner called the next day to thank the whole team involved.

Ultimately the Automatrics MTrack being self powered and covertly hidden was unaffected by the security systems attack.
